A high-performance, high-flow valve to optimize the efficiency of Hi-Capa chargers.

The **ARCTURUS RS® Hi-Capa Ultra High-Flow outlet valve** is made of **stainless steel** for excellent durability. Its **optimized gas flow** , **high flow rate** , and low opening force improve the efficiency of the **Gas Blowback** system in **ARCTURUS Tactical Vanguard Hi-Capa magazines** .

- **Type:** Output Valve
- **Brand: ARCTURUS**
- **Range:** RS® Ultra High-Flow
- **Construction:** Stainless steel
- **Compatibility: ARCTURUS Tactical Vanguard Hi-Capa** Magazines
- **Function:** Gas distribution valve for GBB magazine
- **Gas circuit:** Optimized for better efficiency
- **Speed:** High speed (Ultra High-Flow)
- **Opening:** Low actuation force

Optimize the performance of your Hi-Capa charger

The **ARCTURUS RS® Ultra High-Flow outlet valve** is designed to replace the original valve on **Tactical Vanguard Hi-Capa magazines** . Thanks to its optimized design, it improves gas flow for more efficient operation of the **Gas Blowback** system.

A stainless steel design

Made of **stainless steel** , this valve offers excellent resistance to wear, corrosion, and mechanical stress. Its precision manufacturing helps maintain consistent charger operation over time.

Optimized gas flow

The internal circuit of this **Ultra High-Flow** version is designed to promote more efficient gas flow. The manufacturer indicates improved pneumatic efficiency thanks to optimized circulation, allowing for more effective use of the gas available in the loader.

Low opening force

The valve requires less actuation force to open. This feature facilitates the operation of the mechanism during firing and contributes to a smoother gas supply, thus improving the consistency of the replica's cycle.

Compatible with Tactical Vanguard magazines

Developed for **ARCTURUS Tactical Vanguard Hi-Capa magazines** , this valve is an ideal solution for replacing a worn part or improving original performance while maintaining perfect compatibility with manufacturer specifications.

FAQ

Which chargers is this valve compatible with?

It is compatible with ARCTURUS Tactical Vanguard Hi-Capa gas magazines.

What is the advantage of an Ultra High-Flow valve?

Its optimized internal circuit promotes a higher gas flow and improves the efficiency of the Gas Blowback system according to the manufacturer's specifications.

Why is a low opening force advantageous?

A reduced opening force facilitates valve actuation and contributes to a smoother gas supply, helping to ensure consistent operation of the replica.
