PU02021	ARCTURUS Hi-Capa RS® MIM Hammer Set	Vente libre	22.00 € incl. tax

A MIM steel hammer assembly designed to enhance the reliability of the Hi-Capa mechanism.

The **ARCTURUS RS® Hi-Capa Square Hammer assembly** is made of **MIM steel** for excellent wear resistance. Compatible with **ARCTURUS Tactical Vanguard airsoft guns** , it improves the robustness of the mechanism, the durability of internal components, and the smoothness of the bolt cycle in **GBB** replicas.

- **Type:** Square Hammer Assembly
- **Brand: ARCTURUS**
- **Range:** RS®
- **Construction:** Steel MIM (Metal Injection Molding)
- **Compatibility: ARCTURUS Tactical Vanguard Hi-Capa**
- **Function:** Hammer assembly for GBB trigger mechanism
- **Advantages:** Enhanced strength, increased durability, and smoother bolt action

An essential component of the Hi-Capa mechanism

The **ARCTURUS RS® Hi-Capa Square Hammer assembly** plays a direct role in the operation of the firing mechanism of a **gas blowback** replica. It contributes to triggering the shot and ensuring the smooth operation of the bolt's mechanical cycle, while also guaranteeing consistent platform function.

Made of MIM steel

Made from **MIM (Metal Injection Molding) steel** , this assembly benefits from excellent mechanical strength and high manufacturing precision. This process allows for the production of components particularly suited to the repeated stresses of intensively used **Hi-Capa** replicas.

Robustness and smooth operation

According to the manufacturer, this version improves the resistance of impact-resistant parts while promoting smoother bolt action. This combination helps maintain consistent operation and extend the lifespan of the internal mechanism.

Compatible with Tactical Vanguard platforms

Developed for the **ARCTURUS Tactical Vanguard Hi-Capa** , this hammer set is an ideal solution for replacing an original part or reinforcing a configuration intended for heavy use, while maintaining compatibility with the manufacturer's specifications.

A solution suitable for both maintenance and upgrades

Whether for preventative maintenance or mechanical preparation, this **Square Hammer Assembly** improves the strength and reliability of the mechanism. Its precise machining allows for seamless integration with other components of the **Hi-Capa ARCTURUS** platform.

FAQ

Which replicas is this hammer set compatible with?

It is compatible with ARCTURUS Tactical Vanguard Hi-Capa platforms.

What are the advantages of manufacturing with MIM steel?

MIM steel offers excellent wear resistance, high dimensional accuracy and long service life for heavily stressed components.

What is the role of a Square Hammer Assembly?

This assembly is a central component of the firing mechanism of a Hi-Capa GBB replica. It contributes to triggering the shot and ensuring the proper functioning of the bolt's mechanical cycle.
