SKU	Designation	French Law	MSRP
PU02019	ARCTURUS Hi-Capa RS® hammer pin	Vente libre	9.80 € incl. tax

A high-precision hammer shaft for smoother and more durable operation.

The **ARCTURUS RS® Hi-Capa Ultra-Smooth hammer axle** is made from a **reinforced, self-lubricating material** to reduce friction. Compatible with **ARCTURUS Tactical Vanguards** , it promotes smoother movement of the mechanism while improving the durability of **GBB** components.

- **Type:** Hammer shaft
- **Brand: ARCTURUS**
- **Range:** RS® Ultra-Smooth
- **Construction:** Reinforced material with self-lubricating properties
- **Compatibility: ARCTURUS Tactical Vanguard Hi-Capa**
- **Function:** Hammer guide axis in the detent mechanism
- **Advantages:** Reduced friction, smoother movement and limited wear

A precision axis for the Hi-Capa mechanism

The **ARCTURUS RS® Ultra-Smooth hammer pin** helps guide and hold the hammer within the replica's internal mechanism. Although it's a discreet part, its role is essential to ensuring consistent operation and smooth **gas blowback** system movement.

Reinforced material with self-lubricating properties

Made from a **reinforced material with self-lubricating properties** , this shaft naturally reduces friction between moving parts. This feature helps minimize mechanical wear and maintain the smooth operation of the mechanism over repeated cycles.

A more flexible mechanism

By reducing internal resistance, this axis promotes smoother hammer movement. The manufacturer indicates this improved smoothness of operation, particularly noticeable during intensive use or when performing meticulous mechanical preparation.

Compatible with Tactical Vanguard platforms

Developed specifically for the **ARCTURUS Tactical Vanguard Hi-Capa** , this axle directly replaces the original part and integrates perfectly into the mechanics designed by the manufacturer.

An ideal part for maintenance or upgrade

During a complete overhaul of the mechanism or when replacing internal components, this **Hammer Shaft** is a suitable choice to maintain precise and reliable operation. Its technical material optimizes internal movement without altering the replica's original functionality.

FAQ

Which replicas is this hammer shaft compatible with?

It is compatible with ARCTURUS Tactical Vanguard Hi-Capa platforms.

What is the advantage of a self-lubricating material?

Self-lubricating properties reduce friction between moving parts, limit wear and promote smoother operation of the mechanism.

What is the role of a Hammer Shaft?

The hammer axis serves as a pivot point and guide for the hammer of the detent mechanism, ensuring its proper alignment and the regularity of its operation.
