An optimized seal to improve the sealing and performance of Hi-Capa magazines.

The **ARCTURUS RS® Hi-Capa Optimize magazine seal** features an **optimized rubber formulation** and a specific interface with the **nozzle**. Its **optimized gas circuit** improves the sealing and efficiency of the **Gas Blowback** system in **ARCTURUS Tactical Vanguard Hi-Capa magazines**.

- **Type:** Magazine Gasket
- **Brand:** ARCTURUS
- **Range:** RS® Optimize
- **Compatibility:** ARCTURUS Tactical Vanguard Hi-Capa Magazines
- **Material:** Optimized formulation rubber
- **Function:** To ensure a seal between the magazine and the nozzle
- **Design:** Optimized nozzle interface and improved gas circuit
- **Advantages:** Improved gas efficiency and increased yield

Optimized sealing for Hi-Capa chargers

The **ARCTURUS RS® Hi-Capa Optimize magazine seal** ensures a tight seal between the magazine and the nozzle during each firing cycle. This interface is essential for minimizing gas leaks and guaranteeing consistent operation of the **Gas Blowback** system.

A specific rubber formulation

This seal is made from an **optimized rubber formulation**, developed to improve sealing and maintain its mechanical properties over time. It helps maintain effective contact between the magazine and the nozzle.

Optimized gas circuit

According to the manufacturer, the **Magazine Gasket Optimize** design improves gas flow thanks to a redesigned interface with the nozzle and an optimized circuit. This architecture contributes to better gas efficiency in the magazine.

Compatible with Tactical Vanguard magazines

Designed for **ARCTURUS Tactical Vanguard Hi-Capa magazines**, this seal is a direct replacement for the original part. It provides a suitable solution for both preventative maintenance and replacing a worn seal.

An essential part for maintenance

Subjected to repeated compression during firing cycles, the magazine seal is one of the wear parts of a **GBB** replica. Replacing it helps preserve original performance and maintain good efficiency of the pneumatic system.

FAQ

Which chargers is this seal compatible with?

It is compatible with ARCTURUS Tactical Vanguard Hi-Capa magazines.

What is the purpose of a GBB magazine seal?

It ensures a seal between the magazine and the nozzle in order to limit gas losses and guarantee regular operation of the replica.

What are the advantages of this Optimize version?

The manufacturer indicates an optimized rubber formulation, an improved interface with the nozzle and a redesigned gas circuit to increase the efficiency of the Gas Blowback system.
