PU02023	ARCTURUS Hi-Capa RS® Trigger MIM Steel	Vente libre	14.00 € incl. tax

A MIM steel trigger designed to enhance the reliability of the Hi-Capa mechanism.

The **ARCTURUS RS® Hi-Capa trigger** is made of **MIM steel** to offer excellent wear resistance. Compatible with **ARCTURUS Tactical Vanguards** , it improves the robustness of the mechanism, the durability of internal components, and the smoothness of the bolt cycle in **gas blowback** replicas.

- **Type:** Trigger (Sear)
- **Brand: ARCTURUS**
- **Range:** RS®
- **Construction:** Steel MIM (Metal Injection Molding)
- **Compatibility: ARCTURUS Tactical Vanguard Hi-Capa**
- **Function:** Internal part of the detent mechanism
- **Advantages:** Enhanced strength, increased durability, and smoother bolt action

An essential part of the detent mechanism

The **ARCTURUS RS® Hi-Capa trigger** is one of the essential components of the trigger mechanism of a **Gas Blowback** replica. It ensures the retention and release of the hammer during firing, directly contributing to the proper functioning of the mechanical cycle.

Made of MIM steel

Made from **MIM (Metal Injection Molding) steel** , this trigger benefits from excellent dimensional accuracy and high wear resistance. This manufacturing process is particularly well-suited to parts subjected to repeated stress in **Hi-Capa** mechanisms.

Robustness and smooth operation

According to the manufacturer, this version improves mechanical strength, the durability of contact surfaces, and contributes to **smoother bolt action** . It is an ideal solution for replacing an original part or upgrading a heavily used replica.

Compatible with Tactical Vanguard platforms

Developed for the **ARCTURUS Tactical Vanguard Hi-Capa** , this part respects the original dimensions to ensure perfect compatibility with the platform's mechanics.

A solution suitable for both maintenance and upgrades

Whether for preventative maintenance or optimization of the internal mechanism, this **ARCTURUS RS® trigger** helps to preserve the reliability and regularity of the operation of your replica.

FAQ

Which replicas is this trigger compatible with?

It is compatible with ARCTURUS Tactical Vanguard Hi-Capa platforms.

What are the advantages of a MIM steel trigger?

MIM steel offers excellent wear resistance, high manufacturing precision and a long service life for the parts of the detent mechanism.

What is the role of a trigger (Sear) on a Hi-Capa GBB?

The trigger mechanism holds and then releases the hammer when the trigger is pulled. Its proper condition is essential for the reliable operation of the firing mechanism.
