PU02024	ARCTURUS Hi-Capa RS® Trigger MIM Steel	Vente libre	14.00 € incl. tax

A MIM steel valve striker designed to improve the reliability of the Hi-Capa GBB mechanism.

The **ARCTURUS RS® Hi-Capa valve striker** is made of **MIM steel** for excellent wear resistance. Compatible with **ARCTURUS Tactical Vanguards** , it improves the robustness of the mechanism, the durability of internal components, and the smoothness of the bolt cycle in **gas blowback** replicas.

- **Type:** Valve Knocker
- **Brand: ARCTURUS**
- **Range:** RS®
- **Construction:** Steel MIM (Metal Injection Molding)
- **Compatibility: ARCTURUS Tactical Vanguard Hi-Capa**
- **Function:** Punches the magazine valve when firing
- **Advantages:** Enhanced strength, increased durability, and smoother bolt action

An essential component of the Gas Blowback mechanism

The **ARCTURUS RS® Hi-Capa valve striker** , also known as **the Valve Knocker** , is activated during each firing cycle by striking the magazine valve to release the necessary amount of gas for the replica to function. Its proper condition is essential for the smooth operation of the **Gas Blowback** system.

Made of MIM steel

Made from **MIM (Metal Injection Molding) steel** , this component offers excellent resistance to mechanical stress and wear. This manufacturing process guarantees high dimensional accuracy, particularly important for parts of the percussion mechanism.

Robustness and smooth operation

According to the manufacturer, this version improves the component's strength, durability, and the smoothness of the cylinder head's movement. It provides a suitable solution for replacing a worn part or optimizing a platform used intensively.

Compatible with Tactical Vanguard platforms

Developed for the **ARCTURUS Tactical Vanguard Hi-Capa** , this **Valve Knocker** meets the original specifications to ensure perfect compatibility with the replica's mechanism.

An ideal part for maintenance

During a complete overhaul of the internal mechanism, replacing the valve striker helps maintain consistent operation and the reliability of the striking system. It is a part particularly well-suited for the preventative maintenance of **Hi-Capa** platforms.

FAQ

Which replicas is this valve striker compatible with?

It is compatible with ARCTURUS Tactical Vanguard Hi-Capa platforms.

What is the role of a Valve Knocker?

The Valve Knocker strikes the magazine valve to release the gas necessary for the Gas Blowback replica to function with each shot.

What are the advantages of MIM steel?

MIM steel offers excellent wear resistance, high manufacturing precision and a long service life for heavily stressed parts of the mechanism.
