A GBBR platform licensed by BCMAIR with V3 system, EVO TDC hop-up and GUNFIGHTER equipment.

The VFC BCM MK2 11.5" MCMR EVO V3 GBBR combines the **M4 V3 GBB** system with an adjustable and quick-release EVO TDC hop-up. Its **10-inch MCMR M-LOK** handguard, GUNFIGHTER controls, and licensed BCMAIR markings make up a compact, well-equipped platform designed for easy setup and maintenance.

- **Brand: VFC**
- **Model: BCM MK2 11.5" MCMR EVO Standard Ver. V3**
- **License: BCMAIR** / BCM
- **Reference: VF2-LBCM-MCMR-S-BK03**
- **Type:** GBBR airsoft replica
- **Caliber:** 6 mm Airsoft
- **Color:** black
- **Operation:** Gas Blowback
- **Internal system:** VFC M4 V3 GBB
- **Power supply:** Top Gas / Green Gas HFC22
- **Firing modes:** semi-automatic, automatic, and safe
- **Power:** approximately 360 FPS
- **Magazine capacity:** 30 BBs
- **Length:** 710 to 790 mm
- **Internal barrel:** 275 mm
- **External Canon:** 11.5 inches
- **Handguard:** BCM MCMR M-LOK 10-inch CNC-machined aluminum
- **Hop-up:** adjustable, EVO AR GBB system
- **Hop-up adjustment:** TDC with rear click-lock screw

- **Hop-up chamber:** steel
- **Hop-up disassembly:** quick, without removing the outer barrel or handguard
- **Valve knocker:** V3 steel
- **Nozzle:** High performance V3, non-NPAS
- **Buffer:** heavy, high-speed assembly
- **Upper:** BCM MK2 style
- **Flash hider:** BCM Compensator MOD0, steel, style 5.56
- **Arming lever:** BCM GUNFIGHTER Mod 4X4 ambidextrous
- **Pistol grip:** BCM GUNFIGHTER Mod 2
- Gunfighter's tactical trigger **guard**
- **Back plate:** compatible with QD strap attachment
- **Stock:** BCM GUNFIGHTER Mod0 SOPMOD
- **Markings:** Realistic BCM markings engraved on the receiver, bolt carrier, and magazine
- **Contents:** replica, 30-round gas magazine, long hex key, and EVO Hop-Up adjustment tool

A BCM platform licensed under BCMAIR

The **VFC BCM MK2 11.5'' MCMR EVO V3 GBBR** is produced under license **from BCMAIR** and incorporates several distinctive elements from the BCM universe. Markings are reproduced on the receiver, bolt carrier, and magazine, with engraving designed to enhance the visual fidelity of this configuration.

The upper receiver adopts the **BCM MK2** style and is paired with an 11.5-inch outer barrel. With an overall length between 710 and 790 mm, the whole package maintains a relatively compact size for an AR-style GBBR replica.

BCM MCMR M-LOK 10-inch Handguard

The front section features a CNC-machined aluminum **10-inch BCM MCMR M-LOK** . This interface allows for the mounting of accessories using the M-LOK standard while maintaining a slim and continuous handguard profile.

The muzzle device is a **BCM Compensator MOD0** in steel, in a configuration inspired by a 5.56 flash hider. The assembly forms a front end consistent with the tactical aesthetics of this licensed series.

EVO TDC hop-up adjustable by clicks

The **EVO AR GBB Hop-Up** system is based on a TDC, or Top Dead Center, architecture. Adjustment is made via a rear click-stop screw, making it easier to return to a specific setting and to make incremental corrections.

The hop-up chamber and its internal components are made of steel. The design also allows for quick disassembly: the inner barrel or hop-up bucking can be accessed without removing the outer barrel or handguard.

VFC M4 V3 GBB Internal System

The mechanics are based on the **VFC M4 V3 GBB** . This version incorporates a steel V3 valve knocker, a high-performance non-NPAS type V3 nozzle, and a high-speed heavy buffer assembly.

This configuration works with the replica's gas blowback cycle and moves with the mechanism with each shot. It is designed for use with **Top Gas or Green Gas HFC22** .

Integrated BCM GUNFIGHTER controls

The equipment includes several authorized **BCM GUNFIGHTER** components. The Mod 4X4 charging handle is ambidextrous, the pistol grip features the Mod 2 profile, and the trigger guard is also derived from this tactical configuration.

At the rear, a plate compatible with a QD sling swivel precedes the **Mod0 SOPMOD** stock. These elements give the platform a coherent setup right out of the box, going beyond a simple aesthetic reproduction of the BCM receiver.

30-round gas magazine and adjustment accessories included

The replica comes with a 30-round **VFC BCM M4** gas magazine. The package also includes a long hex key for quick hop-up removal and a specific tool for adjusting it.

These accessories directly complement the EVO design of the system and allow adjustments or access to the inner barrel using the tools provided for this configuration.

FAQ

What are the advantages of the TDC EVO hop-up system?

The TDC adjustment is operated from the top of the hop-up system and uses a rear click-stop screw. This design allows for incremental adjustments and makes it easier to locate a specific setting.

Do I need to remove the handguard to change the hop-up bucking?

No. The quick-disassembly design allows access to the inner barrel and hop-up bucking without removing the outer barrel or handguard. A dedicated long hex key is included with the replica.

Which BCM accessories are already installed on this version?

The configuration includes, among other things, the MCMR M-LOK 10-inch handguard, the MOD0 Compensator, the GUNFIGHTER Mod 4X4 charging handle, the Mod 2 grip, a tactical trigger guard, a QD backplate, and the Mod0 SOPMOD stock.
