PCKMOOD2700F	.270 Winchester	AL190	C	M14x1	Locked carbine	819.00 € incl. tax

A bolt-action rifle with threaded barrel, supplied with a 3-9x40 scope for a complete hunting setup.

The **Mossberg Patriot OD Green** package combines a **.270 Winchester bolt-action rifle** with a 3-9x40 scope. Its **56cm fluted free-floating barrel** features an M14x1 thread for mounting a compatible muzzle device. The OD Green synthetic stock and recoil pad create a configuration designed for regular field use. A **spiral bolt** , adjustable trigger pull (1-3 kg), and detachable magazine with a 5+1 round capacity complete the package. Pre-installed Weaver bases facilitate the mounting of the included scope: a well-rounded setup for a rifle equipped for hunting from a blind or by stalking.

- **Brand: Mossberg**
- **Model: Patriot OD Green**
- **Type:** bolt-action rifle
- **Caliber: .270 Winchester**
- **Capacity:** 5+1 shots
- **Canon:** floating and flute-like
- **Barrel length:** 56 cm
- **Thread:** M14x1
- **Total length:** 107 cm
- **Weight:** 2950 g
- **Stock:** Synthetic OD Green
- **Configuration:** right-handed
- **Trigger pull:** adjustable from 1 to 3 kg
- **Charger:** removable
- **Mounting:** Weaver bases
- **Optics included:** 3-9x40 telescope

A kit equipped around the .270 Winchester caliber

This **Mossberg Patriot OD Green** comes pre-equipped with a 3-9x40 scope. This combination forms a **hunting** setup for the **.270 Winchester** caliber. The pre-installed Weaver bases provide the optic mounting interface.

56 cm fluted floating cannon

The 56 cm barrel features a **free-floating** , **fluted** design. The principle of a free-floating barrel is to prevent contact with the stock along its length, while the fluting here characterizes its external profile. This barrel is one of the defining technical features of this version of the Patriot.

M14x1 thread for mouth device

At its muzzle, the barrel features an **M14x1 thread** . This interface allows for the mounting of a muzzle device using the exact same standard, such as a compatible muzzle brake or suppressor. The thread thus eliminates the need to modify the barrel to accommodate a suitable accessory.

Adjustable trigger pull from 1 to 3 kg

The **adjustable trigger** allows you to vary the trigger pull weight between 1 and 3 kg. The adjustment is made at the trigger assembly: after removing the screws located at the front and rear of the magazine well, the magazine can be removed to access the trigger pull weight adjustment screw. This allows you to adapt the setting within the range intended by the mechanism.

Spiral cylinder head and removable power supply

The rifle operates using a **bolt action** with a spiral-bore bolt. It is fed from a **detachable magazine** with a stated capacity of 5+1 rounds. This is a classic bolt-action rifle design, requiring each shot to be fired.

OD Green synthetic stock

The synthetic stock is finished in **OD Green** and features a **recoil pad** . The synthetic material is particularly well-suited to a field rifle, where the stock may be exposed to moisture, mud, or varying weather conditions.

A setup for ambush and stalking

With its overall length of 107 cm and a claimed weight of 2,950 g, this configuration combines a bolt-action rifle, a variable-magnification scope, and a threaded barrel. It can therefore be used in various **big game hunting** situations, particularly when hunting from a blind or stalking, depending on the hunting conditions and the ammunition used.

Regulation

Category: C, 1° b), for this manual repeating configuration with a capacity of 6 shots.

Acquisition conditions: acquisition subject to declaration. The purchaser must meet the regulatory conditions applicable to category C weapons and have the required supporting documents depending on their situation, including a valid hunting permit or a valid sports license in the cases provided for by the regulations.

Carrying and transporting: Carrying without a legitimate reason is prohibited. Transporting the weapon requires a legitimate reason, and it must be rendered immediately unusable.

Storage: the weapon must be stored in a safe or suitable strongbox, or according to one of the other regulatory methods provided for category C weapons. Ammunition is stored separately.

FAQ

What equipment can be mounted on the M14x1 thread?

The M14x1 thread accepts a muzzle device using the same interface. It can notably accommodate a compatible muzzle brake or sound moderator.

What is the advantage of an adjustable trigger on a bolt-action rifle?

An adjustable trigger pull allows you to adapt the starting weight within the range specified by the mechanism. On this configuration, the advertised adjustment ranges from 1 to 3 kg.

What are the conditions for purchasing this rifle in France?

This category C weapon is subject to declaration. Its acquisition requires compliance with applicable regulatory conditions and presentation of the required supporting documents depending on the buyer's situation, including a valid hunting permit or a valid sports license in cases provided for by the regulations.
