A compact side-by-side express rifle weighing 2.605 kg, chambered in .44 Remington Magnum.

The **Daive Pedersoli Kodiak Survivalist** combines two 460mm side-by-side rifled barrels with a compact 905mm overall length. Chambered in **.44 Remington Magnum** and weighing only 2.605 kg, this **double rifle** maintains a portable size while allowing for immediate access to the second barrel. The case-hardened receiver and oiled walnut stock with checkering enhance its classic aesthetics, while the pre-drilled rib accepts the optional Picatinny rail for mounting optics.

- **Brand:** Daive Pedersoli
- **Model:** Kodiak Survivalist
- **Type:** side-by-side express rifle
- **Caliber:** .44 Remington Magnum
- **Number of stripes:** 6
- **No scratches:** 508 mm / 1:20
- **Barrel length:** 460 mm / 18 1/8"
- **Total length:** 905 mm / 35 5/8"
- **Weight:** 2.605 kg / 5.73 lb
- **Rocker:** mottled finish
- **Stock:** oiled walnut with checkering
- **Optical mounting:** pre-drilled strip for optional Picatinny rail
- **Category:** C

Two side-by-side barrels and a second shot immediately available

The **Davide Pedersoli Kodiak Survivalist** adopts the characteristic architecture of a **double rifle** : two side-by-side barrels, each designed to hold a single cartridge. This arrangement allows the second barrel to be used without going through the reloading cycle of a repeating rifle. It is precisely this mechanical principle that defines this two-shot configuration.

A compact express in .44 Remington Magnum

The choice of the **.44 Remington Magnum cartridge** is complemented by a deliberately compact design. The barrels measure 460 mm (18 1/8"), while the overall length remains a manageable 905 mm. The stated weight is 2.605 kg. For a double rifle, this combination of dimensions and weight directly addresses the manufacturer's objective: to minimize the bulk and weight typically associated with a double-barreled firearm.

Rifled cannons with a 1:20 twist rate

Each rifled barrel contributes to the weapon's express configuration. Manufacturer specifications indicate 6 grooves and a 508 mm twist rate, or **1:20** . The **.44 Remington Magnum** chambering is thus paired with relatively short 460 mm barrels, a key factor in the overall dimensions of the Kodiak Survivalist.

Mottled and oiled walnut rocker

The design remains deliberately traditional. The **mottled metal action** is paired with an **oiled walnut** stock, complemented by finely checkered detailing. The contrast between the mottled metal and the wood thus preserves the classic aesthetic codes of the express rifle, despite the particularly compact size of this version.

Optional Picatinny rail for optics

The design also allows for an upgrade to an optical configuration. The rib is pre-drilled to accept the manufacturer's **optional Picatinny rail** . This interface allows the weapon to be equipped with optics compatible with this standard while retaining the rail as an optional accessory.

French regulations

Category C: This single-shot shoulder weapon falls under category C. Its acquisition is subject to declaration.

Acquisition conditions: the purchaser must meet the regulatory conditions applicable to category C weapons and present a document allowing their acquisition, in particular a validated hunting permit or a valid sports license depending on their situation.

Carrying and transporting: Carrying is prohibited without a legitimate reason. Transporting the weapon requires a legitimate reason, and it must be rendered immediately unusable.

Storage: A category C weapon must be stored in a safe or suitable strongbox, or by dismantling an essential component stored separately, or by means of a device preventing its removal.

Ammunition: .44 Remington Magnum cartridges fall under category C6°. Their acquisition and possession regulations are separate from those of the firearm.

FAQ

What is the advantage of the two side-by-side barrels of an express rifle?

This design provides two barrels, each receiving its own cartridge. The second barrel is therefore available without the mechanical reloading cycle of a repeating rifle.

Can a scope be fitted to this express rifle?

Yes. The strip is pre-drilled to accept the optional Picatinny rail provided by the manufacturer. Optics using a compatible interface can then be mounted on this rail.

Do .44 Remington Magnum cartridges follow the same regime as the weapon?

No. In France, .44 Remington Magnum ammunition is classified as category C6. Its acquisition requires, among other things, a valid permit authorizing the purchase and proof of legal ownership of the corresponding firearm. Possession is limited to 1,000 rounds per firearm.
