A low-cut, waterproof and breathable shoe designed for mobility in temperate climates.

The **Beretta Bryce GTX** combines a **synthetic nubuck** and Cordura® Puma upper with a waterproof and breathable **GORE-TEX Prism** lining. Peripheral reinforcements in coated split leather protect the exterior, while the PU construction contributes to durability and cushioning. With a low-profile design at 15 cm, this hunting shoe promotes mobility in the field.

- **Brand: Beretta**
- **Size: 41 to 45**
- **Model: Bryce GTX**
- **Type:** Low hunting shoe
- **Use:** hunting in temperate climates
- **Upper:** synthetic nubuck, Puma Cordura® and By-cast protectors
- **Lining: GORE-TEX Prism**
- **Outsole:** PU
- **Midsole:** PU
- **Insole:** Ortholite
- **Height:** 15 cm

- **Weight:** 500 g in size 42
- **Composition:** 40% polyurethane, 30% leather, 30% nylon
- **Properties:** Waterproof and breathable

GORE-TEX Prism: protection against moisture

The **GORE-TEX Prism** lining is a key feature of the **Beretta Bryce GTX** . It combines **waterproofing** and breathability, two properties particularly relevant when traversing wet vegetation, trails, and extended periods of walking. The boot is therefore designed for hunting in temperate climates.

A building protected on all sides

The upper combines **synthetic nubuck** , Puma Cordura®, and By-cast reinforcements. The outer fabric perimeter is further reinforced with coated split leather. This construction protects the peripheral areas of the shoe, which are regularly subjected to stress from contact with the ground and vegetation.

15 cm high to maintain mobility

With a height of 15 cm, this **waterproof hunting shoe** intentionally adopts a low profile. This design prioritizes mobility compared to a tall boot and reflects the model's focus on use in temperate climates.

PU soles and Ortholite insole

The construction features a **polyurethane outsole** and midsole made of the same material. PU is used here for its durability and cushioning properties. Inside, an Ortholite insole completes this design focused on comfort.

A low weight for a technical shoe

The stated weight is 500g in size 42. Combined with the 15cm profile, this data clearly places the **Bryce GTX** in **Beretta** 's range of low technical shoes, rather than among high hunting boots.

FAQ

What is the point of a 15cm low hunting boot?

Its reduced height promotes mobility. This configuration is suitable for the model's orientation towards hunting and travel in temperate climate zones, while maintaining a waterproof construction.

Does the GORE-TEX membrane prevent the shoe from breathing?

No. The GORE-TEX Prism lining is specifically designed to combine waterproofing and breathability, ensuring protection against moisture while allowing water vapor to escape.
