A historical steel reproduction inspired by 17th-century round ball molds.

The **Historical Round Ball Mold** is a **.675 caliber steel round ball mold** inspired by 17th-century designs. Intended primarily for French muskets and other compatible .69 caliber historical firearms, it complements the equipment of antique firearms enthusiasts.

- **Type:** Historical round ball mold
- **Projectile caliber:** .675
- **Projectile type:** round bullet
- **Material:** Steel
- **Period of inspiration:** 17th century
- **Compatibility indicated:** compatible with French muskets and other .69 caliber weapons
- **Reference:** 2958 DGHML14650

A mold inspired by 17th-century accessories

The **Historical Round Ball Mold** replicates the characteristic design of old molds used with black powder weapons. Its **steel** construction and long handles give it an appearance faithful to accessories associated with historical muskets.

For .675 caliber round balls

This model corresponds to a **.675 caliber spherical projectile**. It is particularly suitable for **French muskets** and other historical .69 caliber weapons with compatible characteristics.

In the field of antique firearms, the nominal diameter of the weapon and that of the projectile are not necessarily identical. The choice of bullet must therefore correspond to the precise characteristics of the weapon and the chosen loading configuration.

An accessory for antique weapon enthusiasts

With its deliberately traditional design, this mold naturally finds its place among accessories intended for **historical shooting** , musket replicas, and the world of **black powder firearms** . Its appeal lies as much in its function as in its design, directly inspired by antique equipment.

FAQ
