- **Type:** Hunting trophy badge
- **Destination:** Roe deer
- **Material:** Solid oak
- **Height:** 210 mm
- **Width:** 130 mm
- **Shape:** Traditional shield with a pointed base
- **Outline:** Decorative molding carved in wood
- **Wall mounting:** Metal bracket on the back

A traditional display case for your deer trophies

Each harvested roe deer tells a story: a beautiful approach, an unexpected encounter, or a memorable moment in the heart of the territory. The **solid oak Country deer patch** allows you to preserve and showcase these memories through an elegant wall display.

With its dimensions of **210 x 130 mm** , this wooden base is a suitable size for creating **roe deer trophies** . Its traditional silhouette, characterized by a slightly rounded upper part, curved shoulders and a pointed lower end, harmoniously complements the lines of the antlers.

The natural charm and robustness of solid oak

Solid oak is a particularly prized material for making trophy display accessories. Its strength, natural grain, and warm tones give it an authentic character that perfectly complements the world of hunting.

Unlike materials covered with a simple decorative veneer, solid wood is a homogeneous material throughout its thickness. Natural variations in color and grain make each emblem unique.

A decorative molding for a neat finish

The outline is crafted with a **raised molding** that accentuates the curves of the shield. This finish adds depth to the piece and highlights the central surface designed to hold the trophy.

The pointed shape, characteristic of **traditional taxidermy patches** , creates a balanced and elegant silhouette. The wood retains its natural appearance, revealing the grain and nuances inherent to oak.

A practical stand for a wall display

The back of the badge is fitted with a **metal fastener** fixed in a vertical groove, making it easy to hang on the wall. The front is designed to accommodate a skull or a deer head using a suitable mounting system.

This **wall-mounted roe deer trophy display** fits perfectly in a trophy room, hunting lodge, or any interior with character. It can be used alone to showcase a particular buck or combined with several other displays to create a trophy collection.

FAQ

How to fix a deer massacre onto a wooden shield?

The skull can be attached using a screw that passes through the bony part of the skull or a specific trophy mounting system. It is important to center the skull on the escutcheon and use a suitable mounting system to ensure the stability of the entire piece.

What size badge should I choose for a roe deer trophy?

The size depends on the volume of the skull and the type of trophy preparation. A 210 x 130 mm mount is suitable for many roe deer mounts, particularly those with a prepared or cropped skull. For a particularly large whole skull, a larger mount may be preferable to maintain harmonious proportions.

Can an oak badge be personalized with a date or inscription?

Solid oak can be engraved with a personalized design, notably to indicate the date of the harvest, the hunting area, or the hunter's initials. Laser or mechanical engraving can be performed by a professional, depending on the available surface area and the wood's finish.
