SKU	Designation	French Law	Caliber	Shots	Colors	MSRP
MCG262	Mec-Gar GLOCK® 17 9mm 20-Round Magazine	B	9 x 19	20	Black	52.00 € incl. tax

A 20-round steel magazine with anti-friction coating and green follower.

The **Mec-Gar 20-round 9mm magazine for the GLOCK® 17** features a heat-treated carbon steel body protected by a friction-reducing coating. Its capacity increases the capacity of a standard 17-round magazine by three rounds. Precision-formed ribs guide the ammunition, while reinforced rims promote consistent chambering. The high-visibility green follower is made of impact-resistant, self-lubricating polymer, allowing for quick identification of an empty magazine. A high-strength piano wire spring ensures smooth cartridge feeding, and a black polymer baseplate completes the design. This **Mec-Gar** magazine is compatible with the GLOCK® 17, 34, 45, and 47 pistols, as well as the Glock 19x.

- **Brand:** Mec-Gar
- **Type:** Detachable magazine for handgun
- **Compatibility:** GLOCK® 17, 34, 45, 47 and 19X
- **Caliber:** 9 mm
- **Capacity:** 20 cartridges
- **Category:** B11°
- **Body:** Heat-treated carbon steel
- **Coating:** anti-friction
- **Follower:** self-lubricating, impact-resistant polymer
- **Tracker color:** high-visibility green
- **Spring:** high-strength piano wire
- **Feeding lips:** reinforced
- **Heel:** black polymer
- **Color:** black

A 20-round Mec-Gar magazine for GLOCK® pistols

The **Mec-Gar GLOCK® 17 9mm magazine** increases the capacity to **20 rounds**, compared to 17 for the standard magazine mentioned above. This provides three additional rounds while maintaining compatibility with the original polymer magazine release and trigger. The 20-round capacity does not change the firearm's classification, which remains Category B.

A steel body with an anti-friction coating

The tube is made of **heat-treated carbon steel** . Its low-friction coating facilitates magazine insertion and removal from the pistol. The stamped body remains compatible with the original magazine releases of compatible GLOCK® models.

A diet guided right down to the strengthened lips

Precision-molded ribs guide each cartridge during its ascent. The high-strength piano wire spring pushes the self-lubricating polymer follower, while reinforced lips ensure proper cartridge presentation for chambering. The follower's green color enhances its visibility when the magazine is empty.

Compatible with four GLOCK® pistols

This **20-round 9mm magazine** is compatible with **GLOCK® 17** , **GLOCK® 34** , **GLOCK® 45** and **GLOCK® 47** and **19X** pistols.

FAQ

Does a 20-shot capacity result in classification in category A1?

No. For a handgun, the A1 threshold applies to an integrated or inserted magazine holding more than 20 rounds, allowing for more than 21 shots without reloading. This 20-round magazine remains classified in category B11°; the compatible firearm retains its own classification in this configuration.
