LG1091	Airsoft replica WELL PRO WE06 PPK-20 GBBR Full Metal black	Vente libre	38	66	1975	Gas	479.00 € incl. tax

A gas-powered PPK-20 replica with a steel body, blowback system, adjustable NPAS power, and folding stock for a realistic gaming experience.

The **WELL PRO WE06 PPK-20 GBBR** is a gas blowback airsoft pistol replica inspired by the Russian PPK-20. Its **full metal construction, combining steel and aluminum** , faithfully reproduces the lines and controls of the original model. Equipped with a **gas blowback (GBBR)** system, it simulates the movement of the slide and provides a realistic recoil sensation with each shot. It offers semi-automatic and automatic firing modes. Compact and versatile, this replica features a **folding and adjustable stock** , fire selector controls accessible from both sides, and Picatinny rails with M-LOK interfaces for accessory mounting. Supplied with a 38-round gas magazine, the WELL PRO WE06 PPK-20 combines mechanical realism, modern ergonomics, and modularity.

Technical specifications of the WELL PRO WE06 PPK-20

- **Brand:** WELL PRO
- **Model:** WE06-GM PPK-20
- **Type:** Airsoft submachine gun replica
- **Platform:** PP-19 Vityaz / PPK-20
- **Caliber:** 6mm airsoft BBs
- **Propulsion:** gas (GBBR)
- **Blowback system:** yes, moving bolt
- **Firing modes:** semi-automatic and automatic
- **Energy output:** 0.84 J
- **Advertised velocity:** 300 FPS with 0.20g BBs

- **Power adjustment:** integrated NPAS system
- **NPAS beach announced:** 100 to 300 FPS
- **Hop-up:** adjustable
- **Construction:** steel, aluminum and polymer
- **Body:** steel
- **External barrel:** aluminum
- **Inner barrel length:** 155 mm
- **Inner barrel diameter:** 6.04 mm
- **Barrel thread:** 14 mm counterclockwise (CCW)
- **Stock:** Folding and adjustable polymer
- **Length with stock folded:** 475 mm
- **Length with stock extended:** 660 mm
- **Rails:** Picatinny and M-LOK interfaces
- **Controls:** Ambidextrous fire selector
- **Strap attachment:** QD point
- **Magazine capacity:** 38 rounds
- **Magazine type:** Real Cap gas
- **Charger material:** nylon
- **Advertised weight:** 1975 g
- **Color:** black
- **Serial number:** yes
- **Manufacturer reference:** WE06-GM
- **EAN:** 5904420018414

A modern reproduction of the PPK-20

The **WELL PRO WE06 PPK-20 GBBR** replicates the architecture of the PPK-20 submachine gun, a modern evolution of the PP-19 Vityaz platform. Its design incorporates the features of the version presented in 2023, with improved ergonomics, a folding stock, and numerous accessory mounting options.

The replica retains the characteristic lines of the AK platform while incorporating contemporary equipment. Its markings and controls help to reproduce the appearance and handling of the original model.

A full metal construction made of steel and aluminum

The **WELL PRO WE06-GM** features a multi-material construction. The main body is made of steel, as are the muzzle device, some locking elements, the stock hinge, and the magazine release button.

The outer barrel, bolt, rear sight, top rail, and certain selector switch components are made of aluminum. Ergonomic components, including the stock and handguard, use polymer to reduce overall weight.

This design provides a feeling of solidity and contributes to the realism of the replica during handling.

A gas blowback system for realistic sensations

The **WELL PRO PPK-20** operates with a **Gas Blowback (GBBR)** mechanism. When firing, part of the gas propels the BB while another part operates the moving slide, reproducing the mechanical cycle and generating a recoil effect.

This system allows for a handling experience close to that of a real mechanical platform, particularly thanks to the movement of the breechblock and the firing controls.

The replica has two operating modes: **semi-automatic** for single-shot firing and **automatic** for burst firing.

Adjustable power with integrated NPAS system

The **WELL PRO WE06 PPK-20** incorporates a **Negative Pressure Air System (NPAS)** directly into its nozzle. This device allows you to adjust the gas output power to adapt the replica's performance to the playing conditions.

The advertised adjustment range is from **100 to 300 FPS** . Actual power may vary depending on the gas used, ambient temperature, and measurement conditions.

The **adjustable hop-up** also allows you to adjust the effect applied to the BBs to modify their trajectory. Its adjustment mechanism is located at the barrel base attachment point.

Compact ergonomics with folding stock

The **WE06 PPK-20** features a polymer stock that folds to the right side and is adjustable in length. This configuration reduces the replica's size for storage and transport.

With a stated length of **475 mm with the stock folded** and **660 mm with the stock extended** , it has a particularly compact size for a GBBR replica.

The stock also incorporates a **QD** quick attachment point allowing the installation of a compatible sling.

Ambidextrous controls and mounting rails

The fire selector on the **WELL PRO PPK-20** is accessible from both sides of the replica. It combines an AK-style lever on the right side with an additional control on the left, making it easier to operate for both right- and left-handed players.

The replica features **Picatinny rails** on the top of the receiver and on the handguard. **M-LOK** interfaces also allow for the addition of compatible accessories.

This modularity allows the replica's configuration to be customized according to the player's preferences.

Real Cap 38-round gas magazine

The **WELL PRO WE06-GM** comes with a gas magazine with a capacity of **38 6mm BBs** . This Real Cap type magazine prioritizes a reduced capacity, consistent with the realistic operation of the GBBR platform.

The manufacturer recommends using **0.23g or 0.25g** BBs. The choice of BB weight can be adjusted according to measured performance and hop-up settings.

Contents of the WELL PRO WE06 PPK-20 pack

- **1 WELL PRO WE06 PPK-20 GBBR black airsoft replica**
- **1 Real Cap 38-round gas magazine**

FAQ - WELL PRO WE06 PPK-20

Can the power of the WELL PRO WE06 PPK-20 be adjusted?

Yes. The replica incorporates an NPAS system that allows you to adjust the gas output. The manufacturer states an adjustment range of 100 to 300 FPS, which may vary depending on the gas and temperature.

What type of thread does the WELL PRO PPK-20 have?

The WELL PRO WE06 PPK-20 has a 14 mm counterclockwise (14 mm CCW) barrel thread, allowing the mounting of compatible accessories.
