Set of 2 whistles with self-adhesive base to attach to your vehicle.
The relative wind causes the emission of ultrasounds that prevent the game from your approach and prevents it from throwing itself in front of your car.

Whistle on the roof of your car to keep animals off the road and avoid collisions. Animals hear from afar the ultrasounds produced by these whistles and move away from the road before the vehicle arrives. Especially recommended for people crossing wooded areas at sunrise and sunset or at night.
