| SKU    | Designation | French Law | Caliber  | Bullet type | Energy (J) | Speed (m/s) | Pack. | Grains | MSRP               |
|--------|-------------|------------|----------|-------------|------------|-------------|-------|--------|--------------------|
| RWS901 | type KS     | C          | 9.3 x 62 | KS          | 4503       | 750         | 20    | 247    | 122.00 € incl. tax |
| RWS904 | UNI type    | C          | 9.3 x 62 | UNI Classic | 4521       | 690         | 20    | 293    | 130.00 € incl. tax |
| RWS900 | EVO type    | C          | 9.3 x 62 | Evolution   | 4490       | 690         | 20    | 291    | 132.00 € incl. tax |

The RWS ammunition is:

- Reliability
- versatility
- Precision
- Non corrosive
- Efficiency
- Innovation

For more than a century, the Rheinisch Westfälische Sprengstoff-Actien-Gesellschaft, or RWS, has produced quality ammunition for hunting, sport shooting and long-range shooting (TLD).

The different warheads and their characteristics:

- **DRIVEN HUNT:** deformation warhead, made of copper, designed specifically for driven hunting. The projectile with its flat tip, its boat-tail base and its performance grooves guarantee exceptional stopping power with maximum residual weight, even at short distances. Driven Hunt bullets do not contain lead (lead free).

- **EVOLUTION GREEN:** lead-free bullet with limited fragmentation. Neutral tin core, to guarantee food safety. Thanks to its pre-fragmented front core and its Speed Tip tip, the Evolution Green bullet allows strong stopping power at long distances.

- **HIT:** expanding projectile without lead, with a constant weight on a non-malleable base. The assembly guarantees rapid mushrooming of the warhead, generating strong stopping power. It is perfectly suited to

medium game hunting.

- **SPEED TIP:** cartridge fitted with a Speed Tip projectile with tip having low air resistance to maintain a straight trajectory. The rear part of the projectile, in the shape of a V, ensures precision and stability of the trajectory, to combine regularity and maximum stopping power.

- **UNI CLASSICS:** specially developed for big game hunting. The harder, heavier rear core deploys its effects more in depth, providing high knockdown power and consistent fragmentation.

- **KS CONICAL POINT:** warhead with controlled expansion resulting from the combination of a thickness of jacket and an ideal density of the lead core. The outer shape of the projectile guarantees low air resistance.
