Mimic the mouse to attract the fox. Simply blow into the call by varying the length and power of the exhalations.

### **NORDIK MINI PREDATOR - Special foxes**

#### ■ Instructions

The Nordik Mini Predator Caller has been specially developed to meet the demands of hunters of small predators, especially in cold weather. The call is easy to use and its mouth is frost-proof. The call can produce a wide variety of sounds.

#### ■ Moans and cries of rodents

To mimic the mouse and moaning voles, place the rubber band as far forward as possible of the call, your teeth or lips to the outermost part of the membrane and blow short shots in the call until you get some squiiiick.

#### ■ Distress calls from rabbit and hare

These calls are easy to make by placing rubber band, your teeth or your lips in the middle of the mouth and blowing into the call. The more you advance the headband and your lips on the membrane the sound is serious. Vary the long and short sounds for 15 to 25 seconds and repeat every 3-4 minutes. Open and close your hand in front of the opening of the call to make your calls more alive and realistic.
