- **Hop-Up:** Adjustable
- **Construction:** Metal cylinder head / polymer body
- **Rail:** Integrated Picatinny
- **Barrel:** Threaded for silencer
- **Sighting devices:** 3-point system
- **Internal barrel length:** 74 mm
- **Weight:** 595 g
- **Color:** Black

A compact platform with blow-back sensations

The **BERSA BP9CC Blow Back** takes the modern design of the Argentinian compact pistol and transforms it into a dynamic and realistic airsoft version. Its blowback system generates a slide movement with each shot, providing enhanced feel and a more immersive experience.

Efficient CO2 operation

Powered by a **12g CO2** cartridge integrated into the grip, this replica develops an energy of approximately **1.49 Joules** . This configuration ensures good mechanical responsiveness as well as excellent operational consistency.

Metal and polymer construction

The **MS/PF** design combines a metal slide with a polymer body to achieve a good balance between robustness and lightness. At only 595 g, the BP9CC remains particularly comfortable to handle during long sessions.

Integrated Picatinny rail

The Picatinny rail located under the barrel allows for the installation of a compatible tactical light or laser. This modularity provides greater configuration options to suit the player's preferences.

Threaded barrel and 3-point sight

The threaded outer barrel allows for the addition of a compatible suppressor, while the **3-dot** sighting system facilitates rapid target acquisition. This configuration is popular for both recreational shooting and airsoft games.

Officially licensed by BERSA

This replica is officially licensed by **BERSA** and features authentic markings and a unique serial number. Since 1958, the Argentinian brand has been developing handguns renowned for their reliability and robustness.

- **Operation:** CO2 blowback
- **Firing mode:** Double action
- **Capacity:** 15 marbles
- **Rail:** Picatinny
- **Canon:** Silent threaded
- **Construction:** Metal and polymer
- **Weight:** 595 g
- **Compatible charger:** Ref. 17310

FAQ

Does the BERSA BP9CC run on CO2?

Yes, this replica uses a 12g CO2 cartridge integrated into the grip.

Is the blowback system functional?

Yes, the blowback moving slide works with every shot to reproduce realistic sensations.

Can a silencer or a lamp be installed?

Yes, the threaded barrel accepts a compatible silencer and the Picatinny rail allows for the addition of tactical accessories.
