The reference moderators sound, very effective and ultra easy to clean!

- One-piece baffle system extremely easy to clean.
- Gain of 28 to 33 dB (about 1000 times less noise) with standard subsonic ammunition.
- Standard thread 22 LR, 1/2 x 20 UNF.
- Neat Finnish manufacture in black anodized aeronautical aluminum.
- Easy disassembly for cleaning: 3 pieces only. Machined tubular body, one-piece baffles bearing the thread of the front plug. Front cap with parallel 2-sided print for socket with a flat key.
- Delivered in blister.

- One of the most efficient and certainly the easiest to maintain in its category!
- Almost total absence of sound with Winchester z long: the only audible noise is that of the firing pin and the impact of the bullet on the target!
- No deviation of the projectile observed during the tests whether with subsonic ammunition, long z or hi speed.
- Also compatible with 22 LR magnum, 17 MACH 2 and 17 HMR calibres. When used with supersonic ammunition, only the detonation is attenuated, the supersonic 'bang' remains but does not allow the origin of the shot to be located.
- Dimensions: l. 140.3mm x d. 32mm.
- Weight: about 190g.
