MFI1272	Prart Cartridge with Expansive Ball 27.5g - Cal.12 / 70	C	cal. 12	70 mm	25	3168	480	Bullet	21.00 € incl. tax

Double impact effect (deep penetration / strong expansion in soft zone)

The central arrow is made of lead and the brass hammer mass. Its deformation is more important at impact.

- Speed (OV) 480 m / s - Energy (E0) 3168 d

The "Fier" bullet is a projectile made up of 4 parts in 12 and 16 gauge.

- A central arrow to ensure significant penetration,
- A hammer hammer in which to insert the arrow, to release the kinetic energy,
- A 2-piece container that encloses the whole thing.

It flies in one piece and grips the obstacle very well, it is a little less sensitive to ricochets. The central arrow and hammer mace are only released on impact with the animal and penetrate deeply.

The qualities of the Proud projectile:

- High accuracy
- Double effect on impact (deep penetration / strong expansion in the soft zone)
- Excellent hooking and powerful penetration into the target, even in the event of a tangential shot from the front or from the rear. High and regular speeds.
- High impact energy
- Moderate pressure and damage-free passage through the chokes
- Very low ricochet risk
- High quality French encartouche
- Complies with CIP standards
