The choke Yildiz specifically designed for its 12 caliber rifle models will change the sheaf of shots according to the configuration of the shot, target more or less distant.

Yildiz external chokes increase the barrel length by 25mm.

5 different references to cover all needs:

- Yildiz external 1/4 choke: close target up to 25 meters away, open spray
- Yildiz external 1/2 choke: distance target up to 40 meters, moderately open pattern
- Yildiz external 3/4 choke: target at 35 - 45 meters, tight pattern
- Yildiz external full (4/4) choke: target 45-50 meters, very tight pattern
- Yildiz external cyl. Choke: very close target, very open pattern

On a stacked barrel, the ideal assembly will be the tightest choke on the upper barrel, the lower barrel adopting the choke immediately lower than that of the upper, example: 3/4 upper barrel - 1/2 lower barrel.
