PR1202	Replica pistol DL 60 Socom spring	Vente libre	6 mm airsoft	27	60	13.3	24	650	36.00 € incl. tax

Airsoft replica of the MK23 pistol, Solid Snake's weapon in the Metal Gear Solid video game franchise.

The largest and most impressive spring-loaded pistol - the DL60 Socom features a barrel extension tube that resembles a silencer. The gun is equipped with a Weaver/Picatinny rail for accessories. This heavy pistol is equipped with a fixed Hop-up and the magazine can hold up to 27 bbs.

The MK23 Mod 0 is a semi-automatic pistol designed by the German firm Heckler & Koch and created by order of the United States Special Operations Command (USSOCOM). It served as the basis for the HK USP.

This weapon is designed to be very precise, and for resistance to operation in hostile environments (water, salinity, mud, dust, temperature). It has a thread at the end of the barrel allowing the installation of a silencer. A rail under the barrel and in front of the trigger guard allows the fixing of a laser sighting system LAM (Laser Aiming Module). This pistol only exists in caliber .45 ACP. Composed of a polymer carcass and a steel breech, this weapon is engraved with the mention USSOCOM, when it is delivered to the army.

In fiction, this pistol is the weapon of Mike Ehrmantraut, henchman in the Breaking Bad series, Solid Snake, the hero of the Metal Gear Solid video game series and Gabriel Logan, hero of the Siphon Filter series. It is also available in many installments of the Rainbow Six series. He also recently appeared in Killing floor. It is used by Benicio del Toro in the movie Sicario.
