Adjustable amplification and total comfort for active hunting with complete freedom.

The **Shothunt Standard** are compact electronic earplugs designed for the **hunter** wishing to combine hearing protection and directional amplification, with fine adjustment and extended battery life.

- **Attenuation:** 32 dB (SNR)
- **Amplification:** up to 20 dB (adjustable)
- **Adjustment:** independent dial per ear
- **Hearing pre-adjustment:** on request (up to +40 dB)
- **Battery life:** 220 h (zinc-air battery mod. 312)
- **Weight:** 1 g per earbud
- **Reaction time:** 1.5 ms
- **Directionality:** 360°
- **Waterproofing:** total
- **Contents:** 6 batteries, 6 foam tips, case, brush

360° directional listening

Thanks to **multi-channel digital technology** , the **Shothunt Standard** offers precise sound reproduction, allowing you to pinpoint the source of a sound with exceptional clarity. Whether you're locating a beeper, a hunting companion, or a moving animal, you'll gain a **faster reaction time** in the field.

- **Perception of faint sounds:** footsteps, rustling, quiet creaking
- **Natural sound reproduction:** high-fidelity amplification

Individual adjustment per ear

Thanks to an **adjustment dial** on each earbud, you can fine-tune the amplification volume to your liking. This precise adjustment is especially useful for balancing the listening experience in varied

or noisy environments.

Long battery life for full days

With its **312 zinc-air** battery, the Standard model guarantees up to **220 hours of continuous use** . Perfect for long driven hunts or pass shooting, without fear of it cutting out at a crucial moment.

Intelligent protection against harmful noise

Sounds exceeding **82 dB** are automatically attenuated, effectively protecting you from **gunshots** and other sudden noises. All this without sacrificing your natural hearing of your surroundings.

Enhanced waterproofing and comfortable fit

Each earbud is **waterproof** thanks to **P2i** technology, which protects against moisture, perspiration, and corrosion. The ergonomic design with viscoelastic foam ensures a perfect fit, even during movement.

FAQ

Can the volume be adjusted independently on each ear?

Yes, thanks to an **adjustment dial** on each earpiece, you can adjust the amplification level for each ear.

Can the model be adapted to my hearing?

Yes, it is possible to **request a custom preset** based on a hearing test (up to +40 dB gain).

How long does the battery last?

The zinc-air mod. 312 battery allows up to **220 hours of** continuous use.
