Hearing protection with integrated wireless communication for hunting on the move.

Shothunt Wireless are electronic hunting earpieces with **wireless connectivity** to communicate with radios, walkie-talkies or phones, while providing active protection against harmful noise.

- **Attenuation:** 82 dB (SNR)
- **Connectivity:** Wireless via magnetic induction loop
- **Amplification:** up to 20 dB (adjustable)
- **Adjustment:** independent left/right dial
- **Battery life:** 220 h (zinc-air battery mod. 312)
- **Communication:** PTT (Push-to-Talk) microphone with integrated microphone
- **Waterproofing:** total (P2i treatment)

Discreet communication with your radio or mobile phone

The **Wireless model** allows for **direct connection to radios and phones** via a supplied **magnetic induction loop** (Neckloop). By generating a magnetic field around the neck, the Neckloop transmits the audio signal to your earbuds using **T-Coil** technology.

- **Clear signal:** receive and transmit with integrated PTT microphone
- **Compatibility:** with most radios/walkie-talkies (jack varies by model)
- **Usage:** Clip-on PTT button + integrated microphone for speaking

Multi-channel audio technology

Like other Shothunt models, this Wireless version offers **high-fidelity amplification** of ambient sounds and **automatic attenuation of harmful noises** exceeding 82 dB. 360° directivity ensures a natural and immersive listening experience, even on the go.

Fine-tuning and maximum battery life

A **volume control dial** on each earbud allows you to individually adjust the volume to suit your hearing. A **220-hour** battery life with a size 312 zinc-air battery allows for uninterrupted, intensive use.

Enhanced protection and comfortable fit

Waterproof and protected by **P2i Aridion™** treatment, the earbuds resist moisture, perspiration, and corrosion. The ergonomic in-ear design, with memory foam tips, ensures a secure and comfortable fit all day long.

FAQ

Does this model allow communication with a radio?

Yes, via the supplied **magnetic induction loop** , the **Shothunt Wireless** can connect to a compatible radio or phone (jack required).

Is the microphone integrated?

Yes, a **microphone is integrated into the PTT (Push-To-Talk) button** for speaking without a bulky headset.

How long does the battery last?

The zinc-air mod. 312 battery offers up to **220 hours of** continuous use.
