- **Treatment:** Multi-layer screen
- **Power supply:** 1 CR2032 battery
- **Length:** 8.2 cm
- **Weight:** 115 g
- **Color:** Black

A red dot designed for speed

Thanks to its **1x magnification** and direct reticle projection onto the screen, this **red dot** sight allows for quick and natural target acquisition. Its wide field of view is particularly appreciated during dynamic actions such as **driven hunts** or **sport shooting** sessions, where every fraction of a second counts.

Four reticles to suit your preferences

This **red dot sight** offers four reticle configurations: cross/circle, cross/dot, circle/dot, or simple dot. Each user can select the pattern best suited to their shooting style, distance, or aiming habits, while enjoying a clear and precise display.

Red or green display

The choice between a **red** or **green** reticle, combined with five brightness levels, allows for perfect adjustment of visibility to lighting conditions and the surrounding environment. This versatility improves aiming comfort in bright sunlight, as well as at dawn and dusk.

Simple assembly and precise adjustments

Compatible with **21mm Picatinny rails**, this **red dot sight** installs quickly. Elevation and windage adjustments are easily made using the included Allen wrenches, allowing for precise tuning to suit your firearm and ammunition.

A rugged design for the terrain

Its screen features a **multi-layer coating** that promotes excellent light transmission and a sharp image. Supplied with a protective rubber cap, this **red dot sight** is designed to accompany hunters and shooters on their outings, while remaining compact at only 115g.

FAQ

What reticles are available?

This sight offers four reticles to choose from: cross/circle, cross/dot, circle/dot and simple dot, in order to adapt to the preferences of each user.

Is this red dot sight compatible with a Picatinny rail?

Yes, it comes with a mount compatible with 21mm Picatinny rails.

Can the reticle be used in red or green?

Yes, you can select a red or green display and adjust its brightness using the five available intensity levels to obtain excellent visibility depending on the light conditions.
