- **Ring:** Aluminum
- **Color:** Green / Aluminum
- **Dimensions:** 11 cm x Ø 3.2 cm
- **Weight:** 45 g
- **Packaging:** Individual blister pack

A double reed for added realism

The **Helen Baud Double Mallard Call AC612** uses a dual-reed system to reproduce richer and more natural vocalizations than traditional models. This design facilitates the emission of varied and realistic sounds capable of effectively imitating the calls of the **mallard duck** .

Designed for waterfowl hunting

Whether on a pond, marsh, or wetland, this call allows you to reproduce various vocalizations used by mallards. Its excellent sound projection helps attract the birds' attention while maintaining a credible and natural tone.

Robust materials for heavy-duty use

The **reinforced polycarbonate** body combined with an aluminum ring ensures excellent resistance to the stresses of the terrain. The call perfectly withstands the wet conditions often encountered during waterfowl hunting outings.

Easy to use

Its compact size and ergonomic design allow for comfortable use even during long sessions. Beginner hunters will appreciate its ease of use, while experienced users will benefit from its ability to produce a variety of tonal nuances.

A versatile call for waterfowl enthusiasts

Thanks to its powerful sound and rich tones, the AC612 is an excellent choice for hunters looking for a reliable and effective game call. Its compact size makes it easy to keep within reach throughout the outing.

FAQ

What is a double-reed bird call?

A double-reed call uses two vibrating blades that produce richer, deeper sounds and are often easier to control than a single-reed model.

What game does this call allow you to imitate?

This duck call is specially designed to reproduce the vocalizations of the mallard duck.

Is polycarbonate suitable for use in humid environments?

Yes, polycarbonate offers excellent resistance to moisture and the harsh conditions encountered when hunting waterfowl.
